ELM'S MEADOW SKATING AREA

There are specific ways to test ice for safety. Throwing rocks, branches, sticks, etc is NOT the way to properly test ice for safety. Most debris thrown out on the ice will eventually freeze into the ice surface making it dangerous for skaters.

Please do not throw debris on the ice surface but rather test the ice on the edges of the skating area, at the railroad bed side, by carefully stepping out about six to eight inches proceeding carefully out to about two feet if ice appears safe. Chip ice with tool or stick until you can get a rough idea of how thick ice is. You should always have another person with you when you do this. However, if you should fall thru at this point, the water is only four to 12 inches deep.

RECREATIONAL SKATING

Registrations will be announced shortly for a skating program, (recreational and figure skating only) to be held at the MDC rink in Weymouth. The program will cost about \$12 a person for six weeks, one hour a week. This fee includes bus transportation and ice time. Please watch the paper for further details.

FEBRUARY VACATION PROGRAMS
